Career Objective

Front-end development is where I turn ideas into fast, intuitive, and meaningful user experiences. I'm a curious programmer who enjoys refining things—making them cleaner, faster, and smarter with React and modern UI tools. I'm seeking a team where I can deliver real value while growing through precision, creativity, and continuous improvement.

Skills

Frontend (Primary Skills): JavaScript, React JS, Tailwind CSS, DaisyUI, HTML5, CSS3

Backend (Familiar): Node JS, Express JS, Firebase (Auth), Mongo DB

Tools & Deployment: Git, GitHub, Vercel, Netlify, VS Code

Projects

1. SkillSwap – Skill Sharing Platform

[Live Link](#) | [Repository](#)

Built an interactive skill-exchange platform where users can learn, share, and connect through community-driven skill listings.

- User authentication with Email/Password & Google Login and protected routes.
- Enhanced UX with toast notifications, password reset, auto-fill email, and 404 page.
- Fully responsive UI built with React, Tailwind CSS, DaisyUI, Firebase Auth.

Built with **React JS, Tailwind CSS, Firebase, React Router** and **Daisy UI**

2. EcoTrack – Environmental Challenge Platform

[Live Link](#) | [Client](#) | [Server](#)

Built an Environmental Challenge & Awareness Platform where users can join eco-friendly challenges, track progress, and promote environmental sustainability.

- User authentication using Firebase with secure login & registration.
- Admin dashboard for managing challenges, participants, and community impact.
- All data and progress handled through Node.js, Express.js, and MongoDB.

Built with **React JS, Tailwind CSS, Firebase, ExpressJS**, and **MongoDB**.
